Rat Dissection Lab Report Answers

In this laboratory exercise, the anatomy of the rat will be examined in some detail. You may recall that in your first-year biology course you dissected a grass frog and a fetal pig. You may recognize and remember structures that you learned during that dissection. In Biology 3A, a much more detailed look at mammalian anatomy will be conducted.

Investigation: Rat Dissection - Biology LibreTexts

1. Observe the interior of the rat for any veins and arteries. Veins carry used blood (blue) back to the heart and lungs. Arteries carry oxygenated blood to the muscles and organs that need it. The arteries in your rat should be stained red for easy identification. Use Figures 3 and 4 to help you locate the major veins and arteries.
